Fever and Ague,

Scrofula, or King's Evil, is a constitutional disease, a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living, disordered also. Finally, the instinct of our endance were be its origin, it is hereditary in the constitution, as if in an attempt to expel the noxions of the disorder caused by the venereal infection. Whatever be its origin, it is hereditary in the constitution of solar heat on wet soil, and rises with the watery vapor from it. While the sun is below the horizon this vapor lingers near the earth's surface, and the virus is taken with it through the lungs into the blood. There it acts as an irritating poison on the internal viscera and excreting organs of the blood. Both the virus and the bile accumulate in the circulation, and produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instinct of our end alik indicates the blood is not an attempt to expel the noxions of the produce violent constitutional disorder. The spleen, the kidneys, and the stomach sympathize with the liver, and become disordered also. Finally, the instinct of our end is kinds at the produce violent constitutional disorders. above all, by the venereal infection. Whatever be its origin, it is hereditary in the constitution, descending "from parents to children unto the third and fourth generation;" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

Its effects commence by deposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on exhausted, and waits for the recovery of strength tubercles; in the glands, swellings; and on the surface, cruptions or sores. This foul corruption, which genders in the blood, depresses are the sits or paroxyams of Favra and Acce. wine the health if it is not removed.
We have labored to find, and have found, an

Ayer's Ague Cure. which neutralizes this malarious poison in the disorder with perfect certainty. And it does more, or rather does what is of more service to those subject to this infection. If taken in season it expels it from the system as it is absorbed, and thus keeps it from the system as it is absorbed, and thus keeps those who use it free from its attacks; keeps the system is health although exposed to the disease. Consequently it not only cures, but protects from the great variety of affections which are induced by this malignant influence, such as Remittent Fever, Chill Fever, Dumb, or Masked Ague Periodical Headache, or Billious Headache, Bilous Fevers, Neuralgia, Rheumatism, Gout, Blindness, Touthacks, Estache, Catarrh, Asthma, Palpitations, P. infall Affections of the Shumach and Bowels, all of which, when arising from this cause, will be found to assume more or less the intermittent type. This "Ague Cure" removes the cause of these derangements, and cures the disease.

the disease.

This it accomplishes by stimulating the exerctories to expel the virus from the system; and these organs by degrees become habites to do this their office of their own accord. Hence arises what disorder from the blood, and the rescue of the system from its destructive consequences. Hence it should be employed for the cure of not only Scrofula, but also those other affections which arise from it, such as Entrive tions which arise from the system of their own accord. Hence arises was such as each but often life is not long enough, or is does it at once, and with safety. We have great reason to believe this is a surer as well as safer remedy for the whole class of diseases which are caused by the miasmatic infection, than any other which has been discovered; and it has still another important advantage to the public, which is, that it is cheap as well as good.
